Tailor-made Solutions

ctFit

Tailor-made Solutions

OVERVIEW

CTFit space is a custom built turn-key delivered property which meets all client needs and requirements. Before and during the construction, CTP works closely with a client together with our inhouse design, permitting, construction and property management teams in order to make sure that a property is delivered in an agreed quality and time.

A CTFit solution is ideal for activities with special technical parameters, such as distribution hubs, chilled warehousing, high-tech manufacturing and R&D laboratories.
